## Terms and Conditions - Commercial Air Conditioning Incentives

**Program Offer:** The Program covers products purchased and/or services rendered on or after **January 1, 2021**.

### Equipment and Installation Eligibility Requirements:

- All air conditioners must be ENERGY STAR® labeled and meet current Energy Efficiency Criteria for ENERGY STAR qualified air conditioners. Current ENERGY STAR information, specifications and qualifying equipment list can be found at <http://www.energystar.gov>.
- The following energy efficiency minimums shall be required to receive a rebate:

MINIMUM Energy Efficiency Criteria for ENERGY STAR Qualified Residential Type Air Conditioners (effective 9/15/15)		
Product Type	SEER	EER
Central Air Split Systems	15.0	12.5
Single Package Air Conditioner	15.0	12.5

Criteria for Certified Light Commercial Air Conditioners		
Cooling Capacity	Heating Section Type	Min. Energy Eff. Criteria
≥65,000 Btu/h - < 135,000 Btu/h	Electric Resistance (or None)	12.2 EER; 14.0 IEER
	All other	12.0 EER; 13.8 IEER
≥135,000 Btu/h - < 240,000 Btu/h	Electric Resistance (or None)	12.2 EER; 13.2 IEER
	All other	12.0 EER; 13.0 IEER

Gas/Electric Package Units Shall meet the appropriate air conditioner or heat pump requirements.

Criteria for Certified Light Commercial VRF Multi-Split AC Systems		
Cooling Capacity	Heat Section Type	Min. Energy Eff. Criteria
≥65,000 Btu/h - < 135,000 Btu/h	All	12.0 EER; 17.4 IEER
≥135,000 Btu/h - < 240,000 Btu/h	All	12.0 EER; 16.4 IEER

- The minimum efficiencies shown on this form are values required for ENERGY STAR qualified equipment at the time this form was published. The Customer is responsible to ensure that their system meets the current ENERGY STAR criteria in effect at the time of installation.
- When installing a split system, both a new outdoor unit (condenser) and a new indoor A-coil (evaporator) must be installed.
- Rebates for air conditioners are based on cooling tons. The capacity for units is rated in the AHRI Unitary Directory by its output in "Btuh." This amount must be divided by 12,000 to determine the number of tons.
- Single package units (compressor/blower combination units) must utilize electricity as the source of heating. These units are often installed on a slab or roof.

**IMPORTANT NOTE:** ENERGY STAR labels on equipment do not guarantee that products qualify for this incentive. (Refer to requirements 1-3 above).

### General Terms and Conditions

Rebates shall be pro-rated based on the percent of power supplied by the utility if the customer has distributed generation.

**Application Information:** Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Utility reserves the right to verify sales transactions and to have reasonable access to the Customer's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

**Warranty Information:** The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

**Limitation of Liability:** The Utility's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Utility be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

**Participant Certification:** Participating Customer certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Utility. The Customer agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Utility's rules and qualifications, the rebate amount may be denied or adjusted.

**Program Changes/Termination:** The Utility reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

**Customers must apply for rebates within six (6) months of the purchase date (as shown on the Customer's invoice) and are subject to the current year program offer if received after January 31st.** Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.

**2021 INCENTIVES**

Attach as many copies of this worksheet as necessary to "Commercial Air Conditioner Incentives" Form (Form C5). Please indicate sheet numbers. Worksheet \_\_\_\_\_ of \_\_\_\_\_
